SUMMARY

Full-Stack Developer and product builder focused on shipping real-world web applications quickly. Built and deployed 5+ production-ready full-stack apps using React, Node.js, and modern cloud backends while leveraging AI-assisted development workflows.

TECHNICAL SKILLS

JavaScript, Node.js, React, RESTful APIs, SQL, Git, TypeScript, Docker, AWS, HTML, CSS, Tailwind, Vite, Express.js, Next.js, PostgreSQL, Firebase Firestore, Java, Python, MongoDB, Cursor, Cline, Vibe Coding, AI API Integration, Rapid Prototyping, Product Development, Deployment

PROJECTS

SmileArtist—Social Platform for Writers [Website] | *React, TypeScript, Supabase, PostgreSQL, Vite, TailwindCSS*

- Developed a scalable social platform for writers using React and TypeScript, enhancing user engagement through dynamic feeds and real-time chat functionality.
- Implemented RESTful APIs for user authentication and profile management, ensuring secure and efficient data handling with PostgreSQL as the backend database.
- Designed and optimized a PostgreSQL schema to support a follow system and trending features, improving data retrieval times and user experience.
- Utilized Git for version control and collaborated with a team to deploy the application on AWS, ensuring seamless integration and continuous delivery using Docker.

RoleFitAI [Website] | *React, Node.js, AI APIs*

- Developed an AI-powered resume tailoring platform using React and Node.js, enhancing user experience through seamless integration of ATS scoring features.
- Implemented RESTful APIs to facilitate real-time data processing and interaction between the front-end and back-end, ensuring efficient resume customization.
- Utilized Git for version control and collaboration, maintaining code quality and streamlining the development process across a team of engineers.
- Deployed the application on AWS, leveraging Docker for containerization to ensure scalability and reliability in handling user requests.

SecureSteps—Real-Time Safety App [Website] | *JavaScript, Firebase, Firestore, Leaflet.js*

- Developed a geolocation-based safety platform using JavaScript and Firebase, enhancing community safety through real-time risk zone reporting.
- Implemented an interactive mapping feature with Leaflet.js, allowing users to view live GPS coordinates and report safety concerns effectively.
- Designed and integrated a community-driven alert system, leveraging RESTful APIs for seamless communication and contact management workflows.
- Collaborated with a team using Git for version control, ensuring code quality and efficient deployment of features in a Docker environment.

EDUCATION

B.Tech Computer Science (AI & ML) — SR Group of Institutions (AKTU, Lucknow)	2022–2026
12th (Science) — Sherwood College, Jhansi	2020–2021
10th (Science) — Sherwood College, Jhansi	2018–2019
